Naoki Yoshida

Student, candidate of the Academic Senate of CTU

It has been two years since I entered CTU. During this time, I have faced and overcome many challenges, including cultural and language differences, and unexpected situations. But many people helped me and I managed those problems.
I could have learned a lot at CTU and I am very grateful. I believe this is the time to give back.

If elected, I will focus on the following areas:
- Encourage inter students communication.
- Creating an environment for concentrating on research and study for faculty and students.
- Improving collaboration with students and faculty.
- Actively listening to the opinions of faculty and students and solving problems.
- Enhancing the diversity among students and faculty.

I am new for candidating of the Academic Senate of CTU. I can offer new ideas and fluidity from different cultural backgrounds as an English student.
I want to challenge with you.

Second year
Faculty of Information Technology
Specialization of Information Security
